

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION 5
EMERGENCY RESPONSE BRANCH
9311 GROH ROAD, ROOM 216
GROSSE ILE, MI 48138-1697

February 23, 1995

REPLY TO ATTENTION OF:

MEMORANDUM

SUBJECT: Site Assignments

FROM: Jason El-Zein, Acting Chief, RS1 *Jason El-Zein*

TO: David Anderson, OSC

The following sites are being formally assigned to you:

Nankin Township and Michigan Avenue Dump

Please complete and arrange site files, OSC Report, and/or PRP's compliance letter. Review and address any site clean-up issues and/or refer site to Remedial Branch for final remediation. Prepare final polrep, review and approve/disapprove 1900-55s and invoices. Upon completion of project closure, ship site files to the Records Center in Chicago.

Cyb Tool

Site investigation and draft action memo have been completed. Please contact the enforcement team and restart the process of addressing the environmental problem at this site. Please feel free to contact Ralph if additional background information is needed.

1340 Oakman Boulevard

Site evaluation to document threats was requested by the City of Detroit. The City owns the site through foreclosure. Vats of unknown products are abandoned on site. You will be expected to complete the site evaluation by April 12, 1996. You will be expected to follow through on the evaluation and either close the case by completing a removal site evaluation form to the file, refer it to another Agency by memo, or continue your involvement until the site is clean and the OSC Report is finished.

J.E. Berger Corporation, 5300 Bellevue

RS1 responded to as a PCB spill that was subsequently cleaned up under MDNR oversight. The MDNR reports that the cleanup was done correctly, but the site status since 1986 is in doubt. Berger handled electrical equipment including capacitors and transformers. This location has an interested buyer and could become a Brownsfield site. City of Detroit has requested additional investigation on the contamination levels left behind. You will be expected to completed the site evaluation by April 12, 1996. You will be expected to follow

through on the evaluation and either close the case by completing a removal site evaluation form to the file, refer it to another Agency by memo, or continue your involvement until the site is clean and the OSC Report is finished.
